

Scenario Name: Reserving a table

Participants: John, Mark, Nina

Flow of Events:

1. John, early in the morning, decides that he wants to have dinner at 9:00 PM that day with his fiancé. He opens his laptop and accesses the online table reservation webpage.
2. John opens a reservation form and fills out the time, name, contact info and extra details regarding reservation; after which John is notified that his reservation is awaiting approval.
3. Mark then receives a notification that a new reservation has been placed, and that it requires approval. Mark checks the information and concludes that it is a legit reservation and approves it on the condition that John pays the standard deposit fee.
4. John is notified that his reservation has been approved and that it is awaiting his payment of the deposit fee. John then fills out his credit card information and pays the deposit fee.
5. Upon being notified John has paid his deposit fee, Mark notifies Nina to prepare the reserved table.
6. Mark calls John to let him know his reservation has been approved and to let him know they're expecting him at the reservation time (9:00 PM).
